this monograph provides a novel reliabilist approach to epistemic responsibility assessment the author presents unique arguments for the epistemic significance of belief influencing actions and omissions she grounds her proposal in indirect doxastic control the book consists of four chapters the first two chapters look at the different ways in which an agent might control the revision retention or rejection of her beliefs they provide a systematic overview of the different approaches to doxastic control and contain a thorough study of reasons responsive approaches to direct and indirect doxastic control the third chapter provides a reliabilist approach to epistemic responsibility assessment which is based on indirect doxastic control in the fourth chapter the author examines epistemic peer disagreement and applies her reliabilist approach to epistemic responsibility assessment to this debate she argues that the epistemic significance of peer disagreement does not only rely on the way in which an agent should revise her belief in the face of disagreement it also relies on the way in which an agent should act this book deals with questions of meliorative epistemology in general and with questions concerning doxastic responsibility and epistemic responsibility assessment in particular it will appeal to graduate students and researchers with an interest in epistemology

a number of well developed theories shed light on the question under what circumstances our beliefs enjoy epistemic justification yet comparatively little is known about epistemic defeat when new information causes the loss of epistemic justification this book proposes and defends a detailed account of epistemic defeaters the main kinds of defeaters are analyzed in detail and integrated into a general framework that aims to explain how beliefs lose justification it is argued that defeaters introduce incompatibilities into a noetic system and thereby prompt a structured re evaluation process that makes a justified reinstatement of the defeated belief impossible the account is then applied to the topic of disagreement where it is used in an argument for conciliationism as well as a new explanation for higher order defeat throughout the book the notion of defeat is the center of attention while a number of new issues are discussed at the intersections of defeat and justification specifically new problems are raised for broadly internalist accounts of defeat a fully descriptive reliabilist account of defeat is provided and the case for normative defeat is revisited

this volume gathers eleven new and three previously unpublished essays that take on questions of epistemic justification responsibility and virtue it contains the best recent work in this area by

major figures such as Ernest Sosa, Robert Audi, Alvin Goldman, and Susan Haack.

Few concepts have been considered as essential to the theory of knowledge and rational belief as that of evidence. The simplest theory which accounts for this is evidentialism: the view that epistemic justification for belief—the kind of justification typically taken to be required for knowledge—is determined solely by considerations pertaining to one's evidence. In this groundbreaking book, leading epistemologists from across the spectrum challenge and refine evidentialism, sometimes suggesting that it needs to be expanded in quite surprising directions. Following this, the twin pillars of contemporary evidentialism, Earl Conee and Richard Feldman, respond to each essay. This engaging debate covers a vast number of issues and will illuminate and inform.

Evidentialism is a view about the conditions under which a person is epistemically justified in having a particular doxastic attitude toward a proposition. Evidentialism holds that the justified attitudes are determined entirely by the person's evidence. This is the traditional view of justification; it is now widely opposed. The essays included in this volume develop and defend the tradition. Evidentialism has many assets: in addition to providing an intuitively plausible account of epistemic justification, it helps to resolve the problem of the criterion, helps to disentangle epistemic and ethical evaluations, and illuminates the relationship between epistemic evaluations of beliefs and the evaluation of the methods used to form beliefs. These issues are all addressed in the essays presented here. External world skepticism poses the classic problem for an epistemological theory. The final essay in this volume argues that evidentialism is uniquely well qualified to make sense of skepticism and to respond to its challenge. Evidentialism is a version of epistemic internalism. Recent epistemology has included many attacks on internalism and has seen the development of numerous externalist theories. The essays included here respond to those attacks and raise objections to externalist theories, especially the principal rival, reliabilism. Internalism generally has been criticized for having unacceptable deontological implications for failing to connect epistemic justification to truth and for failing to provide an adequate account of what makes basic beliefs justified. Each of these charges is answered in these essays. The collection includes two previously unpublished essays and new afterwords to five of the reprinted essays. It will be the definitive resource on evidentialism for all epistemologists.

Epistemology is the branch of philosophy that investigates our beliefs, evidence, and claims of knowledge. It is one of the core areas of philosophy and is relevant to an astonishingly broad

range of issues and situations epistemological issues arise whenever we recognize that there is a fact of the matter but we do not know what it is when we wonder about the future or the past or distant places when we seek answers in the sciences and even in our entertainment e g murder mysteries and comedies of misunderstanding the historical dictionary of epistemology provides an overview of this field of study and of the theories concepts and personalities through the use of a list of acronyms a chronology an introductory essay a bibliography and more than 500 cross referenced dictionary entries covering notable concepts theories arguments publications issues and philosophers students and others who wish to acquaint themselves with epistemology will be greatly aided by this reference

in the past thirty years epistemology has been one of the fastest moving disciplines in philosophy the reason for the rapid advancement is partly due to the fact that various schools and movements inside epistemology have developed different answers to classical epistemological problems and partly due to the fact that formal methods from logic probability theory and computability have been utilized to deal with many of the same issues and used for applications outside traditional epistemology new waves in epistemology reflects these changes by letting up and coming scholars describe the current trends as well as discussing the prospects for future development
