the updated second edition of herschel knapp s friendly and practical introduction to statistics shows students how to properly select process and interpret statistics without heavy emphasis on theory formula derivations or abstract mathematical concepts each chapter is structured to answer questions that students most want answered what statistical test should i use for this situation how do i set up the data how do i run the test how do i interpret and document the results online tutorial videos examples screenshots and intuitive illustrations help students get the story from their data as they learn by doing completing practice exercises at the end of each chapter using prepared downloadable data sets

even though the number of working women has steadily increased over the last few years women are still significantly under represented in stem activities i e mathematics informatics science and technology in order to eliminate this under representation numerous education policies and corporate initiatives particularly in the recent past have been aimed at increasing women s enthusiasm for stem activities and professions according to the latest surveys however it is clear that these efforts have not yet led to the desired success compared to their male counterparts women continue to do fewer stem activities one possible reason for this is that relatively little is yet known about the concrete impact of the above education policies on working with innovation and technology what are the gender differences between women and men is it enough to recognize these differences or should these differences ideally not only be recognized but also treated appropriately or even encouraged this anthology deals with current topics in technology and innovation management against the background of these and other gender relevant aspects empirical analyses and experiments in collaboration with companies from various sectors provide a sound scientific basis on which new results and findings are presented how do women and men deal with creativity and competition how are technologies applied and how can differences in access to technology be deduced answers to these and other questions help decision makers in politics and business to proactively use the differences between women and men to motivate women to work in the stem field and to strengthen them by acknowledging existing differences

master scheduling is an essential planning tool that helps manufacturers synchronize their production cycle with actual market demand the third edition of this easy to follow handbook helps you understand the basic and more advanced concepts of master scheduling from implementation to capacity planning to final assembly techniques packed with handy checklists and examples master scheduling third edition delivers guidelines and techniques for a world class master schedule

the contributors to this volume take up the theme of instructed and instructive actions harold garfinkel the founder of ethnomethodology initiated the study of instructed actions as a way to elucidate the embodied production of social order in real time studies of instructions and the actions of following them provide empirical content to the classical theoretical issue of how rules norms and other normative guidelines are conveyed understood and used for producing social actions and structures the studies in this volume address novel technologies of instructed action and non obvious ways in which ordinary actions turn out to be instructive for participants in immediate situations of action and interaction in some cases the studies address specialized practical artistic and recreational activities and in others they address commonplace modes of action and interaction in all cases they focus on how the manifest organization of specific activities is organized with and without explicitly formulated instructions this book will appeal to scholars across the social sciences with interests in ethnomethodological approaches to research by contributing to understandings of how specific actions are instructed and instructive in the circumstances in which they are produced chapter 2 of this book is freely available as a downloadable open access pdf at [taylorfrancis.com](http://taylorfrancis.com) under a creative commons attribution non commercial no derivatives cc by nc nd 4 0 license

introduction to computing and algorithms prepares students for the world of computing by giving them a solid foundation in the study of computer science algorithms by taking an algorithm based approach to the subject this book helps readers grasp overall concepts rather than getting them bogged down with specific syntax details of a programming language that can become obsolete

students work with algorithms from the start and apply these ideas to real problems that computers can help solve the benefit of this approach is that students will understand the power of computers as problem solving tools learn to think like programmers and gain an appreciation of the computer science discipline
