the likelihood of observing condorcet's paradox is known to be very low for elections with a small number of candidates if voters' preferences on candidates reflect any significant degree of a number of different measures of mutual coherence this reinforces the intuitive notion that strange election outcomes should become less likely as voters' preferences become more mutually coherent similar analysis is used here to indicate that this notion is valid for most but not all other voting paradoxes this study also focuses on the condorcet criterion which states that the pairwise majority rule winner should be chosen as the election winner if one exists representations for the condorcet efficiency of the most common voting rules are obtained here as a function of various measures of the degree of mutual coherence of voters' preferences an analysis of the condorcet efficiency representations that are obtained yields strong support for using borda rule

this book explores the relationship between the law and pervasive and persistent reasonable disagreement about justice it reveals the central moral function and creative force of reasonable disagreement in and about the law and shows why and how lawyers and legal philosophers should take reasonable conflict more seriously even though the law should be regarded as the primary mode of settlement of our moral conflicts it can and should also be the object and the forum of further moral conflicts there is more to the rule of law than convergence and determinacy and it is important therefore to question the importance of agreement in law and politics by addressing in detail issues pertaining to the nature and sources of disagreement its extent and significance as well as the procedural institutional and substantive responses to disagreement in the law and their legitimacy this book suggests the value of a comprehensive approach to thinking about conflict which until recently has been analysed in a compartmentalized way it aims to provide a fully fledged political morality of conflict by drawing on the analysis of topical jurisprudential questions in the new light of disagreement developing such a global theory of disagreement in the law should be read in the context of the broader effort of reconstructing a complete account of democratic law making in pluralistic societies the book will be of value not only to legal philosophers and constitutional theorists but also to political and democratic theorists as well as to all those interested in public decision making in conditions of conflict

communication processes of representation and association and how wide the scope of political jurisdictions should be democratic theorists have not sufficiently attended to the ways processes of debate and decision making often marginalize individuals and groups because the norms of political discussion are biased against some forms of expression inclusion and democracy broadens our understanding of democratic communication by reflecting on the positive political functions of narrative rhetorically situated appeals and public protest it reconstructs concepts of civil society and public sphere as enacting such plural forms of communication among debating citizens in large scale societies the book considers issues of the scope of the polity at two levels global and local the scope of a polity should extend as wide as the scope of social and economic interactions that raise issues of justice today this implies the need for global democratic institutions at a more local level processes of residential segregation and the design of municipal jurisdictions often result in the ability for actions in one locale to affect those in other locales without those making the decisions having to include some of those affected in the decision making process metropolitan governments which preserve significant local autonomy may therefore be necessary to promote political equality
