a unique history of how private spaces in public such as public restrooms and dressing rooms developed in the united states at the turn of the twentieth century before the late nineteenth century americans bathed dressed undressed and relieved themselves in the privacy of their own homes yet from 1880 to 1930 the social forces of urbanization industrialization and immigration combined to increasingly lure americans out of the private realm and into the public sphere in private spaces in public places laura w rouleau offers a distinctive look at the history of how new private spaces were built into the broader world in deciding what physical form these spaces would take the very meaning of privacy manifested through the physical and social construction of these newly emerging spaces rouleau combines social history with a material culture based analysis to examine the growing importance and physical development of spaces such as department store dressing rooms school locker rooms and public bathrooms that emerged during this era rouleau argues that privacy was physically and socially constructed as these sites were designed to segregate users by gender class race and age creators of these spaces sought to impose their middle class values regarding privacy through the physical regulation of users bodies nonetheless the creators intentions did not always align with the lived reality of these spaces by interrogating how people navigated these private spaces this study offers an understanding of the actual historical experience of privacy at the turn of the twentieth century

friesen demonstrates how transnational csos and ngos can influence the context in which international political decisions are made she shows how by reframing the issues the transnational campaign for the cancellation of third world debt altered the dominant discourse

shifted the agenda and thereby shaped political outcomes

in this concise engaging and provocative work richard porter introduces readers to the economic tools that can be applied to problems involved in handling a diverse range of waste products from business and households emphasizing the impossibility of achieving a zero risk environment porter focuses on the choices that apply in real world decisions about waste acknowledging that effective waste policy integrates knowledge from several disciplines porter focuses on the use of economic analysis to reveal the costs of different policies and therefore how much can be done to meet goals to protect human health and the environment with abundant examples he considers subjects such as landfills incineration and illegal disposal he discusses the international trade in waste the costs and benefits of recycling and special topics such as hazardous materials superfund and nuclear waste while making clear his belief that not every form of waste presents the same amount of risk porter stresses the need for open minded approaches to developing new policies for students policymakers and general readers he provides insight and accessibility to a subject that others might leave out of sight out of mind or buried under an impenetrable prose of statistics and jargon

the world economic forum and transnational networking presents an informative investigation of the wef as a political actor and important part of transnational civil society drawing upon extensive original research frisen analyzes the surprising role the wef has played in international processes
