emergence of individual differences in social context robert b zajonc a priest who was a heavy smoker once asked his bishop if it was all right if he smoked while praying appalled the bishop chastised the priest for the very thought of soiling the solemn moment of prayer with such a filthy habit some years passed and the bishop came again through our priest s parish and our tormented priest asked again about his predicament but he asked a somewhat different question your excellency he said is it all right to pray while smoking there was no hesitation in the bishop s answer of course he said there is nothing in the world that should keep you from praying you can always pray my son you should miss no opportunity to pray whenever you wish to pray by all means pray the relationship between individual differences and social psychology is roughly the same as between smoking and praying many social psychologists and especially experimental social psychologists are openly disdainful of individual difference variables they avoid them in their studies and refuse to incorporate them in theories the reasons for their and we really should say my because the author is no exception in this matter attitude are not obvious

no detailed description available for methodology

two experimental procedures prompted the empirical development of psychophysical models those that measure response frequency often referred to as response probability and those that measure response time sometimes referred to

as reaction time the history of psychophysics is filled with theories that predict one or the other of these two responses yet the persistent reappearance of empirical relationships between these two measures of performance makes clear the need for a theory that both predicts and relates these two measures most likely both response measures are the result of a single process that generates empirical laws relating response time and response probability it is this process its theory description and application that is the topic of the wave theory of difference and similarity originally published in 1992 the author of this book has set out to provide a theoretical foundation for formulating new theories that systematize earlier results and to stimulate new concepts and introduce new tools for exploring mental phenomena and improving mental measurement

this wide ranging handbook presents in depth discussions on the array of subspecialties that comprise the field of sociological theory prominent theorists working in a variety of traditions discuss methodologies and strategies the cultural turn in sociological theorizing interaction processes theorizing from the systemic and macro level new directions in evolutionary theorizing power conflict and change and theorizing from assumptions of rationality

shows how this emerging science influenced and was influenced by the intellectual climate of its times focus is on pioneers in psychology and related fields including wilhelm wundt william james francis galton ivan pavlov sigmund freud and alfred binet first published in 1962 this reissue has a brief new foreword by the author annotation copyrighted by book news inc portland or

the present volume contains the major papers of one of psychology's most iconoclastic scholars in a series of controversial and groundbreaking articles and books. Kenneth Gergen has not only offered a radical challenge to psychology's traditional concept of the self but to its foundation as a science where traditional psychology defines the self as the private possession of individuals operating on the basis of universal principles made manifest through inspection by scientific procedures. The psychologist as a private rational being thus accumulates knowledge of the personal world of the other.

includes university catalogues, president's report, financial report, registers, announcement material, etc.

completely revised and updated encyclopedia of environmental science and engineering. Fifth edition spans the entire spectrum of environmental science and engineering. Still the most comprehensive authoritative reference available in this field, the monumental two-volume encyclopedia has expanded to include 87 articles on topics ranging from acid
