chen he and yan present a range of applications of multiple source big data to core areas of contemporary sociology demonstrating how a theory guided approach to macrosociology can help to understand social change in china especially where traditional approaches are limited by constrained and biased data in each chapter of the book the authors highlight an application of theory guided macrosociology that has the potential to reinvigorate an ambitious open minded and bold approach to sociological research these include social stratification social networks medical care and online

behaviours among many others this research approach focuses on macro level social process and phenomena by using quantitative models to statistically test for associations and causalities suggested by a clearly hypothesised social theory by deploying theory oriented macrosociology where it can best assure macro level robustness and reliability big data applications can be more relevant to and guided by social theory an essential read for sociologists with an interest in quantitative and macro scale research methods which also provides fascinating insights into chinese society as a demonstration of the utility of its methodology
