layla a powerful demon and adrian an angel sent to save corrupt beings are two wandering souls which only together can form a weapon powerful enough to confront their adversaries despite the fact that they ironically belong to two distinct sides in the eternal battle between good and evil the apparition of diabolical beings that call her the chosen and the discovery of a demonic book that precedes the apocalypse forces layla and adrian to prepare together for the battle to revenge past suffering for which the demons that beset them are responsible far from reducing their passion the preparation for the fight accrues it to levels of non human intensity a passion the consummation of which is not possible in the princess of ice and the fallen angel rhapsody 2 layla and adrian must wield the forged swords to confront one another and believe that even if one annihilates the body of the other their love will save their souls

this study investigates the relative influence of various parameters on the kinetic friction coefficient $\mu_{\text{sub k}}$ between ice and different surfaces friction tests were performed with urea doped columnar ice studying the parameters of normal pressure velocity type of material material roughness ice orientation ice hardness and test configuration tests were conducted by pulling a sample of ice over a sheet of material and by pulling a sample of material over an ice sheet an ambient temperature of 1.5 or 1 deg c was maintained throughout and the ice surface hardness was measured using a specially designed apparatus the results of the friction tests revealed that the behavior of $\mu_{\text{sub k}}$ with varying velocity was significantly influenced by the test configuration and material roughness the magnitude of the kinetic

friction coefficient was also affected by varying normal pressure surface roughness and ice hardness additional guidelines for standardized ice friction tests and future investigations were recommended
