richard evans wrote in defence of history at a time when the historian s profession was coming under heavy attack as a result of the cultural turn taken by the discipline during the late 1980s and the 1990s historians were being forced to face up to postmodern thinking which argued that because all texts were the product of biased writers who had incomplete information none could be privileged above others in this reading there could be no objective history merely the study of the texts themselves while in defence of history addresses all aspects of historical method its key focus is on an extensive evaluation of this postmodern thinking evans judges the acceptability of the reasoning advanced by the postmodernists and finds it badly wanting he is strongly critical both of the relevance and of the adequacy of their arguments seeking to show that ultimately they are guilty of failing to accept the logic of their own position all texts are equally valid or invalid they suggest while insisting that the products of their own school are in fact more true than those of their opponents evans concludes by pointing out that this same argument could be advanced to suggest that the works of holocaust deniers are just as valid as are those of historians who accept that the nazis set out to commit genocide so why he demands is no postmodernist willing to say as much a devastating example of the usefulness of relentless evaluation

frederick jackson turner s 1893 essay on the history of the united states remains one of the most famous and influential works in the american canon that is a testament to turner s powers of creative synthesis in a few short pages he succeeded in redefining the way in which whole generations of americans understood the manner in which their country was shaped and their own character moulded by the frontier experience it is largely thanks to turner s influence that the idea of america as the home of a sturdily independent people one prepared ultimately to obtain justice for themselves if they could not find it elsewhere was born the impact of these ideas can still be felt today in many americans suspicion of big government in their attachment to guns even in star trek s vision of space as the final frontier turner s thesis may now be criticised as limited in its exclusion of women and overstated in its focus on the western frontier that it redefined an issue in a highly impactful way

and that it did so exceptionally eloquently cannot be doubted

Joan Scott's work has influenced several generations of historians and helped make the topic of gender central to the way in which the discipline is taught and studied today. At root, a new way of conceptualizing capitalist societies. Scott's theories suggest that gender is better understood as a social construct than as a biological fact. Scott's original contribution to the debate, however, stems in her use of the critical thinking skill of analysis to understand how the arguments of earlier generations of historians were built in order to fully grasp both their structure and the assumptions that underpinned them. From there, Scott was able to use problem solving to resolve the issues that emerged from her analysis, asking productive questions focused on better ways to build a model capable of explaining the historical phenomenon of gender difference. Scott answered these questions by introducing models created by deconstructionist scholars, notably Jacques Derrida, who challenged the idea that any term or concept has a stable or dependable meaning rooted in material reality. She was able, in consequence, to refute that idea that gender inequality is the natural, hence justifiable, consequence of biological sexual differences and issue a fundamental challenge to the capitalist system itself.

Few works of history make as well structured a case for the importance of studying continuity rather than change as Albert Hourani's *A History of the Arab Peoples*. Hourani's work had three major aims: to refute the idea that Arab society stagnated between 1000 and 1800; to study the period through the lens of diverse Arab rather than Muslim history; and to stress intellectual and cultural continuity. All of these intentions were the product of the author's evaluation of a great mass of secondary sources. Many of them devoted to arguing for ideas that contradicted his, and it demanded considerable skill to synthesize from them a coherent and well-evidenced counter-argument. Hourani was able to do this largely because his grasp of the relevance and adequacy of his predecessors' arguments was second to none. His achievement lies in his ability to reject the reasoning of other historians while still making good use of their evidence. In this task, he was aided by an interpretative skill almost equal to his powers of evaluation. *A History of the Arab Peoples* is also a monument to the importance of properly understanding the meaning of available evidence.
